Team ID	Master of Computer Applications
Project Name	Online Learning Engagement and Student Performance Analysis.
Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design.

Activity 1: Interactive and Visually Appealing Dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are key points to consider:

Clear and Intuitive Layout: Structure visual elements logically to ensure seamless navigation and clarity.

Use Appropriate Visualizations: Select chart types (e.g., bar charts, pie charts) that best represent the underlying data relationships.

Colour and Theming: Maintain a consistent color palette and theme to highlight critical metrics without cluttering.

Interactive Filters and Slicers: Allow users to segment and slice data dynamically based on specific dimensions.

Drill-Down Capabilities: Enable users to click into high-level metrics to explore deeper details.

Responsive Design: Ensure the dashboard layout adapts smoothly across different screen sizes and resolutions.

Custom Visuals and Icons: Use clear iconography and custom visual cards to improve visual hierarchy and readability.

Use of Infographics: Incorporate concise visual summaries to communicate key metrics at a glance.

Note: Highlight the major outcomes in form of bullet points

Sample:

Here are five potential outcomes from the dashboard image provided:

- **Total Distance Traveled:** The service has covered a total distance of 4.57K kilometers, indicating the extent of operations.
- **Revenue Generation:** The dashboard shows a revenue of 9.94 million INR, reflecting the financial performance of the service.
- **Passenger Count:** The total number of passengers recorded is 423, providing insights into user engagement and service utilization.
- **Yearly Passenger Trends:** The bar chart indicates the passenger count for each year, highlighting that 2021 had the highest count (104 passengers), while 2022 shows a decrease to 47 passengers.
- **Daily Passenger Distribution:** The pie chart reveals passenger distribution by day, helping to identify peak days for the service and inform operational adjustments.
